

# Design Pattern: Localize & Optimize Traffic

Version 28

Published 7/18/2017 by [IOAKB\\_Community\\_Manager](#) Last updated 5/31/2019 1:58 AM by [tbonnemann](#)

Step one of the [Network Blueprint](#) is represented by the Localize and Optimize Traffic Pattern, which teaches you how to place network transports into colocation hubs, interconnect within the hub and build a geographic mesh to reduce costs and latency while increasing functionality and flexibility.
