

# Solution Blueprints

Version 3

Published 7/11/2019 by [tbonnemann](#) Last updated 7/11/2019 9:31 PM by [tpeluso](#)

Solution blueprints provide a roadmap for re-architecting IT infrastructure to meet technology and business change.

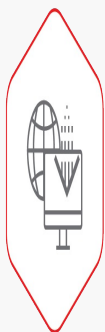

## Analytics

Radically elevate the value of analytic workloads for mobile applications and the engines required to support them by placing analytic processing capabilities at the edge.

[Learn more...](#)

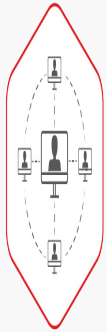

## Content Delivery

Design a network that shortens the distance between all parties in the digital workflow governing content creation, distribution and consumption.

[Learn more...](#)

## Collaboration

Improve global, mobile and user-centric collaboration workload experiences in a changing business and technology landscape.

[Learn more...](#)

## Distributed Security

Rethink the way you architect security and control for the digital edge as part of a new digital edge control framework.
